Enriching Life

Our Principals

## Our Company

TECHNOMATICS is engaged in the profession of engineering, operations, and technical services of fluid flow equipments for water, waste water and process liquids. The company is wholly owned by a team of technocrats, providing services to the public and private sectors in India, since 1992.

Our experienced and dedicated team strives to deliver the best possible fluid flow solutions that are environmentally friendly and economically feasible. We pride ourselves on being innovative, result oriented and delivery-focused.

## Our Vision

To provide Value Added Services and Automation systems to our Customers on our products applicable for Fluid Flow Engineering.

**N. Raju** - Managing Director

**R. Ravi Chandran** - Director

### Business Activities

- Product Sales Business
- Project & Turnkey Business
- Operation & Maintenance Business
- Back to Back Business
- Service & Spares Business
- Value Added Service & Automation Business

## Design + Engineering

System Study, System Analysis, Project management, Design and Specifications, Approvals and Permits, Tendering and Procurement.

## Planning + Execution

Infrastructure Management, Project Delivery, Strategic Policies, Erection and Commissioning, Contract administration.

## Operation + Optimization

Equipment Optimization, Plant Operation, Trouble Shooting, Energy Audits, Operational Audits, Competativeness and best practices.

## Testing + Training

Commissioning and Training, Manuals and Guidelines, Contracting Out, In plant Training.

### Business Sectors

- Water Supply and Waste Water
- Paper Industry
- Textile and Process
- Municipal Infrastructure & Urban Development
- Iron & Steel Industry
- Engineering & OEM
- Building Services & Infrastructure
- Cement Industry
- Pharmaceutical
- Sugar Industry
- Chemical & Petro chemical
- Oil & Gas

## Product Sales Business

Our Stock and Sales Business is to cater the customer requirement of Routine and maintenance. We understand the customer need and maintain stock levels of our products- PUMPS, VALVES, WATER METERS of all standard sizes.

Our wear-house and logistics are well equipped to meet the minimum down time of customer requirement.

## Back to Back Business

Right product sizing and selection is made with proper understanding of user requirements. Composite orders are handled with care to suit the system requirement and execute the order with minimum lead time.

## Project & Turnkey Business

We involve in Design, Engineering, Supply, Delivery, Erection and Commissioning of pumps, valves, water meters and Control panels for all water supply, utility and process industries.

Executed various projects of River water pumping station, Desalination Plants, Cooling water system.

## Service & Spares Business

We maintain records of all supply equipment data with Model and Size for Customer wise / Sector wise and maintain adequate stock of spares to meet the maintenance and breakdown requirements. Our service team is equipped for both on-site and off site service. We undertake refurbishment, retrofitting of Fluid Flow Equipments.

We undertake energy audits and optimization of our pumps & systems, UFW and leak detection in Water Supply System for Flow Meters.

## Operation & Maintenance Business

Our focuses in O&M contracts have strengthened our customer relationship. We involve in Erection & Commissioning of Pumpsets, Valves and Water meters and make periodical visits to monitor the performance of our supply equipments.

We maintain O&M for Desalination plant, pumping machinery and combined Water Supply Scheme. Also undertake preventive maintenance, Annual Maintenance Contract and Annual Service Contract.

## Value Added Service & Automation Business

We offer package pumping system for HYPN / HVAC / Fire Fighting / Water management system for various sectors including Buildings. We offer BMS and remote monitoring with SCADA & Telemetry Systems.

Our Scope involves System study, Design, Engineering, Supply and Commissioning of package pumping systems, Water Metering system, Hydraulic control valves for CWSS and Cross Country Pipelines.
